

SCREW-CAPS for still wines

STELVIN® Lux and STELVIN® Lux+ are the two last generations of STELVIN® screwcaps. These closures have an insert in the aluminium shell with an appropriate liner for your wine. This innovation brings your product a very high quality appearance, without any external threads.

Decoration is wider than the regular STELVIN® screwcap. The whole surface can be decorated with many solutions like top inked embossed, silk-screen printing on skirt...

STELVIN® Lux and STELVIN® Lux+ give elegance and modernity to the most prestigious wines.
